Tripods

A TRIPOD is a three-legged stand used to hold your camera steady while you pan, tilt or simply record a static shot. Tripods usually have one of two adapters that make it possible to attach a camera to them: either a quick-release shoe or a simple screw-in bolt. The best kind of tripod head is a fluid head.

Never leave a camera unattended while mounted on a tripod. If there's an emergency and you must leave the camera, designate someone to supervise it until you can return.
